Ribersgade 12.1.1.
8700 Horsens
Denmark

TECHNICAL SKILLS

Programming

Java · C# · Python · JavaScript · TypeScript

Web & frontend

React · HTML5 · CSS3 · responsive design

Backend

REST APIs · GraphQL · OOP · SOLID · design patterns

Data

SQL · PostgreSQL · MySQL · Entity Framework Core

Other tools

Git · Postman · VS Code · IntelliJ IDEA · Agile / Scrum

Additional exposure

RabbitMQ · SignalR · WCF · sockets

LANGUAGES

Serbian (native)
Bosnian & Croatian
Albanian & Macedonian
English
Danish

OPEN TO

Remote junior development, software QA, AI model evaluation and multilingual technology projects. Flexible freelance or part-time opportunities.

PROFILE

I'm studying Software Technology Engineering at VIA University College and enjoy the practical side of building software: figuring out how things should work, writing code and improving it when something doesn't go as planned. Through university projects, I've worked with web development, object-oriented programming, databases and team-based development. I also volunteer at ReDI School, where I teach JavaScript, HTML and CSS. I'm looking for remote work where I can contribute, keep learning and put these skills to use.

EXPERIENCE

Volunteer Web Development Instructor

ReDI School of Digital Integration | April 2026 – Present

• Teach JavaScript, HTML and CSS and help learners work through practical exercises.

• Explain technical ideas in a clear, approachable way and support students when they get stuck.

SELECTED ACADEMIC EXPERIENCE

Software development & architecture

Built object-oriented solutions in Java, C# and Python, using SOLID principles and clean-code practices to organise and improve the code.

Web development & databases

Created responsive web interfaces and worked with relational data models and SQL queries. Used PostgreSQL, MySQL and Entity Framework Core in coursework.

Team projects & system design

Worked in Scrum teams, taking part in sprint planning, stand-ups and retrospectives. Used use-case, activity and domain models to plan software solutions.

EDUCATION

BEng studies, Software Technology Engineering

VIA University College | 2025 – Present

JavaScript Development Course

ReDI School of Digital Integration | 2023 – 2024
